Camrose, AB

Canada

To whom it may concern,

My name is Nash Boisvert, and I am currently a DMIT student with a burning passion. I have been anxiously waiting to write this letter since the beginning of the program, and in a retrospective way, since childhood.

I have been absolutely enamored with technology since youth. I have picked every device apart to raw PCB and put it back together. I remember learning file structures from installing game mods as a small child. I have jailbroken every phone I've ever owned. I also remember bricking my phone because I was too young to know what I was doing, but no one was going to stop me from trying.

I have even used opensource technologies to navigate the daily challenges of my diabetes. The moment I saw my blood sugar graph in a perfectly straight line, as opposed to dips and valleys, as the direct result of a Github project (OpenAPS) was the exact moment I wanted to dedicate my life to code. I realized that I could not only create interesting and fun programs and games but I could possibly change people's lives for the better.

After around a year of self-teaching Python3 in my spare time away from my fulltime job, I ended up enrolled here. Since being here at NAIT, I have so far maintained a very high GPA, and helped other students along the way. During my first week here, I created a Discord server for my peers that I have owned and moderated since. It is a fantastic little group of friends, and I always appreciate jumping in on assisting students with tough concepts.

I have made many great friends, I have developed many desirable skills such as SQL, C#, Python3, and I feel like I have made one of the best decisions of my entire life… pursuing a newfound passion. Now, its time to use all of that to make some money and have a smile on my face while doing it.

Please take the time to consider me for a Co-op position at your company. I am available for either a 4 or 8 month supervised Co-op to help me get through school, and get my foot in the door in the tech world.

Thank you for your consideration,

Nash Boisvert
